Subject: New resources and key reports available

Dear Feedback Network member,

### **Resources Available on Performance Measures**

When the Washington Health Alliance released the first results from the Washington State Common Set of Measures we began to understand where we must address health needs in our state. We will have a better understanding of where to target health care quality improvement efforts at both the systemic and local levels. We will begin to have a common reference point so that we can engage and collaborate efficiently. And we can begin chipping away at areas where inequity persists.

But perhaps the most impactful change for each of us will be the ability to take this powerful tool and put it to work for our own health and for our families. The Washington Health Alliance's Community Checkup website is not only a systemic tool, it's also *your* tool.

The Community Checkup reports and several infographics are available as resources to help you:

### **Quarterly Report and Operational Plan Sent to CMS**

The Healthier Washington team has submitted a draft operational plan to the Centers for Medicare and Medicaid Services. The plan represents the blueprint for the work taking place and planned under the initiative.

The team also recently submitted its SIM grant third quarter report. This progress report captures a range of activities and achievements August 1 through October 31.
